

Sales were \$270,500 and \$337,500 for the years ended 31 March 1994 and 1995 respectively. Corresponding figures for cost of sales were \$184,500 and \$240,500 respectively. Purchases for 1994 amounted to \$194,500.

**Required:**

Calculate the following ratios for 1994 and 1995:

- (a) gross profit ratio;
- (b) stock turnover rate;
- (c) current ratio;
- (d) quick ratio; and
- (e) credit period received from trade creditors (in months).

(Calculations to one decimal place) (10 marks)

**1997 Q.2**

The financial information of Games Limited for the year ended 31 December 1996 is presented below:

|                     | \$             | \$             |
|---------------------|----------------|----------------|
| Credit sales        |                | 504,000        |
| Opening stock       | 84,000         |                |
| Add: Purchases      | <u>382,200</u> |                |
|                     | 466,200        |                |
| Less: Closing stock | <u>154,000</u> |                |
| Cost of sales       |                | <u>312,200</u> |
| Gross profit        |                | <u>191,800</u> |
| Net profit          |                | 47,600         |

|   | Balance sheet as at 31 December 1996 |                  |
|---|--------------------------------------|------------------|
|   | \$                                   | \$               |
| <b>Fixed assets (at net book value)</b> |                                      |                  |
| Plant and equipment                     | 610,400                              |                  |
| Furniture and fittings                  | <u>173,600</u>                       |                  |

| Stock                                   | 154,000                              |                  |
| Debtors                                 | 105,000                              |                  |
| Bank                                    | <u>7,000</u>                         | <u>266,000</u>   |
|   |                                      | <u>1,050,000</u> |
| <b>Shareholders' fund</b>               |                                      |                  |
| Share capital (\$1 ordinary shares)     | 770,000                              |                  |
| Retained earnings                       | <u>64,400</u>                        |                  |
|   | 834,400                              |                  |
| <b>Current liabilities</b>              |                                      |                  |
| Creditors                               | 168,000                              |                  |
| Accruals                                | <u>47,600</u>                        | <u>215,600</u>   |
|   |                                      | <u>1,050,000</u> |

**Required:**

- (a) Calculate the following for 1996:

- (i) Working capital;
- (ii) Return capital employed;
- (iii) Quick ratio;
- (iv) Stock turnover rate;
- (v) Debtors' collection period (in months); and
- (vi) creditors' repayment period (in months).

(Calculations to one decimal place.)

(6 marks)

- (b) Give two possible dangers of having too little working capital. (4 marks)

## 1999 Q.3

| Profit and loss account for the year ended 31 December 2001 |    |                  |
|---|----|------------------|
|   | \$ | \$               |
| Cash sales  |    | 252,000          |
| Credit sales  |    | <u>1,008,000</u> |
|   |    | 1,260,000        |
| Less: Cost of sales   |    |                  |
| Opening stock   |    | 210,000          |
| Purchases   |    | <u>955,500</u>   |
|   |    | 1,165,500        |
| Less: Closing stock   |    | <u>385,000</u>   |
| Gross profit  |    | 780,500          |
| Less: Operating expenses                                    |    | <u>360,500</u>   |
| Net profit  |    | <u>119,000</u>   |

**Balance sheet as at 31 December 2001**

| Assets                 | \$             |
|------------------------|----------------|
| Office equipment       | 1,145,000      |
| Furniture and fittings | 381,000        |
| Stock                  | 385,000        |
| Debtors                | 262,500        |
| Bank                   | <u>451,500</u> |
|                        | 2,625,000      |

|                                    |    |                  |
|------------------------------------|----|------------------|
| Liabilities and shareholders' fund | \$ |                  |
| Creditors                          |    | 420,000          |
| Accruals                           |    | 119,000          |
| Ordinary share capital             |    | 1,925,000        |
| Retained profits                   |    | 161,000          |
|                                    |    | <u>2,625,000</u> |

Grand View Limited had also produced the following ratios for the year 2000.

|                            |             |
|----------------------------|-------------|
| Current ratio              | 1.93 : 1    |
| Quick ratio                | 1.01 : 1    |
| Stock turnover rate        | 3.02 times  |
| Debtors' collection period | 3.26 months |
| Net profit ratio           | 10.07%      |
| Return on capital employed | 6.11%       |

**Required:**

- (a) Compute the following ratios for the year 2001:  
 (i) Current ratio  
 (ii) Quick ratio  
 (iii) Stock turnover rate  
 (iv) Debtors' collection period (in months)  
 (v) Net profit ratio  
 (vi) Return on capital employed  
 (Calculations to two decimal places) (9 marks)
- (b) Based on the ratios for the year 2000, comment briefly on the liquidity and profitability of the company for the year 2001. (5 marks)

2003 Q.4

Hamilton Limited has an issued capital consisting of 100,000 ordinary shares of \$1 each. The information below relates to the year 2001:

| As at 1 January 2001  | \$ |         |
|-----------------------|----|---------|
| Current assets        |    | 45,000  |
| Total assets          |    | 180,000 |
| Long-term liabilities |    | 57,000  |

|                               |         |
|-------------------------------|---------|
| Current ratio                 | 3 : 1   |
| <b>As at 31 December 2001</b> | \$      |
| Fixed assets                  | 153,000 |
| Total assets                  | 213,000 |

|   |        |
|---|--------|
| <b>During the year ended 31 December 2001</b> | \$     |
| Increase in working capital                   | 9,000  |
| Net profit for the current year               | 40,000 |
| Transfer to general reserve                   | 7,000  |
| Retained profit for the current year          | 20,000 |

**You are required to:**

- (a) Calculate the following figures for Hamilton Limited:  
 (i) Fixed assets, 1 January 2001  
 (ii) Current liabilities, 1 January 2001  
 (iii) Shareholders' fund, 1 January 2001  
 (iv) Current assets, 31 December 2001  
 (v) Current liabilities, 31 December 2001  
 (vi) Dividends declared for the year 2001 (8 marks)

On 1 January 2002, Hamilton Limited made an additional issue of 200,000 ordinary shares at \$1.80 per share, payable in full on application.

Applications were received for 220,000 shares and the cash was returned to the unsuccessful applicants on 15 January 2002. The shares were duly allotted to the other applicants on the same date.

On 1 July, Hamilton Limited raised additional finance by issuing \$600,000 5% debentures at 98. Debenture interest was to be paid half-yearly on 30 June and 31 December.

**You are required to:**

- (b) Prepare journal entries for Hamilton Limited to record the above transactions in 2002. (Narrations are not required.) (6 marks)

## 1993 Q.10                      Bank Reconciliation + Ratios

Mr. Lee commenced his business with \$50,000,000, of which \$40,000,000 was used in buying an office. He was engaged in retail trading and all sales were made on a credit basis.

After a year's trading, he was surprised to have a bank overdraft of \$8,255,000 as indicated by the bank statement at 30 April 1993 whereas the cash book showed a credit balance of \$7,865,300.

Upon investigation, he found that:

- (i) Six cheques (which amounted to \$750,000 in total) were deposited on 30 April 1993 but were not yet credited by the bank.
- (ii) An electricity bill settled by the bank's autopay system in April 1993 amounted to \$6,290. It is the practice of the company to record this expense upon receipt of the bank statement of the month.
- (iii) The March balance of \$65,870 in the cash book was carried forward as \$56,780.
- (iv) A debtor settled his account of \$87,500 by credit transfer.
- (v) Interest of \$58,000 was charged by the bank on the overdraft. No record of this had yet been made.
- (vi) A cheque for \$89,000 received from a debtor was returned by the bank marked "UNPAID". This amount was deducted from the balance in the bank statement but had not been entered in the books.
- (vii) Two cheques drawn by Mr. Lee were not yet presented to the bank for payment. They were (#80967) \$420,000 and (#80973) \$75,000.
- (viii) A debt of \$78,000 previously written off as bad was now recovered and a cheque dated 2 May 1993 was received from the customer concerned. This had been recorded in the cash book but the cheque still remained in the cash till.

Mr. Lee tried to draw up a balance sheet to reveal the financial situation of the business but he was hesitant on most of the figures:

|                       | \$000 | \$000 |                            | \$000 | \$000  |
|-----------------------|-------|-------|----------------------------|-------|--------|
| <b>Fixed assets</b>   |       |       | Capital                    |       | 50,000 |
| Premises, net         | ?     |       | Net profit                 |       | ?      |
| Delivery van, net     | ?     | ?     |                            |       | ?      |
|                       |       |       | Drawings                   |       | ?      |
| <b>Current assets</b> |       |       |                            |       | ?      |
| Stock                 | ?     |       | <b>Current liabilities</b> |       |        |
| Debtors               | ?     |       | Creditors                  |       | ?      |
| Cash                  | ?     |       | Bank O/D                   |       | ?      |
|                       |       | ?     |                            |       | ?      |
|                       |       | ?     |                            |       | ?      |

The following data have been complied for your information:

|   |              |
|---|--------------|
| Sales for the year  | \$60,000,000 |
| Gross profit margin                                       | 40%          |
| Net profit to sales                                       | 11%          |
| Return on total assets employed                           | 12.5%        |
| Depreciation of fixed assets                              | 25%          |
| Stock turnover (stock level constant throughout the year) | 6 times      |
| Credit period allowed to debtors                          | 2 months     |
| Current ratio   | 1.4 : 1      |
| Working capital   | \$5,000,000  |

**Required:**

- (a) Update the bank balance in the books of Mr. Lee as at 30 April 1993. (7 marks)
- (b) Prepare a bank reconciliation statement as at 30 April 1993. (3 marks)
- (c) Draw up the balance sheet for Mr. Lee as at 30 April 1993, filling in all the missing figures. (10 marks)

## 2000 Q.7

The profit and loss account of Sunny Fashion for the year ended 31 December 1999 is shown below:

|                              | \$            | \$ | \$               |
|------------------------------|---------------|----|------------------|
| Sales                        |               |    | 1,125,000        |

|                              | \$             | \$             |
| Furniture and fixtures (net) | 18,420         | 18,420         |
| Office equipment (net)       | 32,480         | 32,480         |
| Stock                        | 28,750         | 26,400         |
| Trade debtors                | 29,260         | 30,340         |
| Bank                         | 660            | 660            |
|                              | <u>108,300</u> | <u>108,300</u> |
| Ordinary share capital       | 50,000         | 50,000         |
| Share premium                | 12,890         | 12,890         |
| Retained profits             | 15,500         | 15,500         |
| Trade creditors              | 26,900         | 26,900         |
| Accruals                     | 3,010          | 3,010          |
|                              | <u>108,300</u> | <u>108,300</u> |

**You are required to:**

Calculate (to two decimal places) for Vera Limited the following ratios for the year ended 31 March 2004:

- (a) Quick ratio
- (b) Stock turnover rate
- (c) Debtors' collection period (in months)
- (d) Gross profit ratio
- (e) Returns on capital employed

(10 marks)

## Accounting Ratios

### **2008 – Q4c** out of DSE syllabus.

The Macho Club is a non-profit making organisation which aims at promoting long distance running. Members are required to pay an annual membership fee of \$500. The Club also sells T-shirts to members for cash.

The account balances relating to membership fees and T-shirt trading are as follows:

|                           | <u>As at 1 January 2007</u> | <u>As at 31 December 2007</u> |
|---------------------------|-----------------------------|-------------------------------|
|                           | \$                          | \$                            |
| Prepaid membership fee    | 3 000                       | 1 500                         |
| Accrued membership fee    | 5 500                       | 7 500                         |
| Amount owing to suppliers | 8 970                       | 13 980                        |
| Stock of T-shirts         | 6 320                       | 5 730                         |

The following are the related cash receipts and payments during the year ended 31 December 2007:

|                             | \$     |
|-----------------------------|--------|
| Membership fee received     | 84 000 |
| Payment to suppliers        | 22 890 |
| Commission on T-shirt sales | 4 200  |
| T-shirt sales               | 48 200 |

Accrued membership fee of \$2500 brought down from 2006 was confirmed to be uncollectible and written off in 2007.

### REQUIRED:

- Draw up the membership fee account for Macho Club, showing the amount of income derived from membership fee for the year ended 31 December 2007.  
(4 marks)
- Prepare the trading account for Macho Club for the year ended 31 December 2007, showing the profit or loss on the sales of T-shirts.  
(6 marks)
- Calculate (to two decimal places) the following ratios of Macho Club for the year ended 31 December 2007:
  - Stock turnover rate (in months)
  - Average credit period received from trade creditors (in days)
 (4 marks)

### **1992 - Q.7**

Accounting Ratios

**2006-Q.4b** (Issue of Shares + Ratio)

Ball Limited had an issued share capital consisting of 650 000 ordinary shares of \$1 each as at 1 January 2005. On 1 July 2005, the company made an additional issue of 250 000 ordinary shares at \$1.50 per share, payable in full on application. Applications were received for 260 000 shares on 8 July 2005. The shares were allotted to the successful applicants on 15 July 2005. Cash was returned to the unsuccessful applicants on the same day.

You are required to

- (a) Prepare journal entries for Ball Limited to record the share issue in July 2005.

(Narrations are not required)

(6 marks)

The company's information below relates to the year ended 31 December 2005:

\$

**As at 1 January 2005:**

|                  |         |
|------------------|---------|
| Stock            | 62 430  |
| Debtors          | 60 080  |
| Share premium    | 75 000  |
| Retained profits | 213 000 |

**During year 2005:**

|                    |         |
|--------------------|---------|
| Sales              | 800 000 |
| Purchases          | 500 000 |
| Operating expenses | 320 000 |

**As at 31 December 2005:**

|              |         |
|--------------|---------|
| Stock        | 156 230 |
| Debtors      | 102 400 |
| Cash in bank | 168 370 |
| Creditors    | 184 200 |
| Accruals     | 4 000   |

You are required to:

- (b) Calculate (to one decimal place) the following for year 2005:

- (i) Quick ratio
- (ii) Credit period allowed to debtors (in days)
- (iii) Stock turnover rate

(4 marks)

- (c) Calculate the amount of shareholders' fund as at 31 December 2005

(4 marks)

HKCEE Accounting Ratios

Marking Scheme

1991 Q.2

Question 2

(a) Quick ratio  
 $\frac{\text{current assets less stock}}{\text{current liabilities}}$

$$= \frac{272000}{166600} = 1.6$$

Period allowed for the trade debtors

$$= \frac{\text{Debtors}}{\text{sales}} \times 12 \text{ months}$$

$$= \frac{260000}{460000} \times 12 \text{ months}$$

$$= 6.8 \text{ months}$$

Liquidity position of Long Island Company:

- had \$1.6 sufficient quick assets to meet every \$1 current liabilities
- The credit period allowed for the trade debtors is more than half a year. May need to have tighter control to reduce the risk of bad debts.

Question 2 (Cont'd.)

(b) Stock Turnover Ratio  
 $\frac{\text{cost of goods sold}}{\text{average stock}}$

$$= \frac{346500}{(34600 + 26300) \times \frac{1}{2}} = 11.4$$

Importance of Stock Turnover Ratio:

It shows the number of times the stock is sold in a year.  
 The higher the ratio, the more will be the profit generated from selling the stock if the gross profit percentage stays the same.

1995 Q.2

QUESTION 2

(a) Gross profit ratio

$$\frac{($270500 - \$184500)}{\$270500} \times 100\% = 31.8\%$$

$$\frac{($317500 - \$240500)}{\$337500} \times 100\% = 28.7\%$$

(b) Stock turnover ratio

$$\frac{\text{Gross profit}}{\text{Stock + 1/2 year's stock}} = \frac{\$184500}{\$184500 + \$43000 - \$194500 + \$43000} \times 2 = 4.9 \text{ times}$$

$$\therefore \frac{\text{Gross profit}}{\text{Stock + 1/2 year's stock}} = \frac{\$240500}{\$43000 + \$88500} \times 2 = 3.7 \text{ times}$$

(c) Current ratio

$$\frac{\$94000}{\$46000} = 2.0 : 1$$

$$\frac{\$134500}{\$81000} = 1.7 : 1$$

(d) Quick ratio

$$\frac{(\$94000 - \$43000)}{\$46000} = 1.1 : 1$$

$$\frac{(\$134500 - \$88500)}{\$81000} = 0.6 : 1$$

(e) Credit period received from trade creditors

$$\frac{\$36000}{\$194500} \times 12 \text{ months} = 2.2 \text{ months}$$

$$\frac{\$66000}{(\$240500 + \$88500 - \$43000)} \times 12 \text{ months} = 2.8 \text{ months}$$

$$\text{or } \frac{\$51000}{(\$240500 + \$88500 - \$43000)} \times 12 \text{ months} = 2.1 \text{ months}$$

Total: 10 marks

1997 Q.2

(a) (i) Working capital  
 $\$266\,000 - \$215\,600 = \$50\,400$

(ii) Return on capital employed  
 $\frac{\$47\,600}{\$834\,400} \times 100\% = 5.7\%$

(iii) Quick ratio  
 $\frac{(\$266\,000 - 154\,000)}{\$215\,600} = 0.5:1$

(iv) Stock turnover rate  
 $\frac{\$312\,200}{(\$84\,000 + 154\,000) / 2} = 2.6 \text{ times}$

(v) Debtors' collection period  
 $\frac{\$105\,000}{\$504\,000} \times 12 \text{ months} = 2.5 \text{ months}$

(vi) Creditor's repayment period  
 $\frac{\$168\,000}{\$382\,200} \times 12 \text{ months} = 5.3 \text{ months}$

- (b)
- If a business has too little working capital, there is the danger that creditors will take legal action against the company to get payments, and that the business may well go into liquidation as a result.
  - At best, the business will acquire a reputation for being a slow payer, and it may find suppliers are only willing to supply goods for immediate cash payments i.e. they are not able to buy on credit.
  - Shortage of working capital will also mean that stock is likely to be kept below optimum level for the potential business and that the business may not be able to offer credit terms to its own customers.
  - Above all, there will be a chronic shortage of cash which will often dictate how the business is run, may prevent normal bulk buying taking place and will prove a worry and an embarrassment to all concerned in the management.
- (2 marks for each relevant point, max. 4 marks)

1999 Q.3

(a) (i) Net profit ratio  
1999:  $\frac{\$2\,800}{\$80\,400} \times 100\% = 10.34\%$

1998:  $\frac{\$90\,000}{\$718\,800} \times 100\% = 12.52\%$

(ii) Return on shareholders' fund  
1999:  $\frac{\$2\,800}{(\$428\,000 + \$325\,200)/2} \times 100\% = 21.99\%$

1998:  $\frac{\$90\,000}{(\$325\,200 + \$235\,200)/2} \times 100\% = 32.12\%$

(iii) Quick ratio  
1999:  $\frac{\$722\,400 - \$422\,400}{\$343\,200} = 0.87:1$

1998:  $\frac{\$596\,400 - \$383\,200}{\$320\,400} = 0.67:1$

(iv) Debtors' collection period  
1999:  $\frac{(\$249\,600 + \$181\,200)/2}{\$800\,400} \times 12 \text{ months} = 3.23 \text{ months}$

1998:  $\frac{(\$181\,200 + \$165\,600)/2}{\$718\,800} \times 12 \text{ months} = 2.89 \text{ months}$

(b) Profitability  
The company's profitability deteriorated during 1999 as shown by decreases in net profit ratio and return on shareholders' fund.

Liquidity  
There seems to be improvement in the liquidity position of the company since the quick ratio increased in 1999. However, the company was slower in collecting its debts from debtors in 1999.

2002 Q.3

**QUESTION 3**

- (a) (i) Current ratio =  $\frac{\text{Current assets} + \text{current liabilities}}{\text{Current assets}}$   
 $= \frac{(385\,000 + 262\,500 + 451\,500)}{(210\,000 + 385\,000)}$   
 $= \underline{\underline{2.04 : 1}}$
- (ii) Quick ratio =  $\frac{(\text{Current assets} - \text{stock}) + \text{current liabilities}}{\text{Current assets}}$   
 $= \frac{(262\,500 + 451\,500)}{(210\,000 + 119\,000)}$   
 $= \underline{\underline{1.32 : 1}}$
- (iii) Stock turnover rate =  $\frac{\text{Cost of goods sold} + \text{average stock}}{\text{Average stock}}$   
 $= \frac{780\,500 + [(210\,000 + 385\,000) \times 1/2]}{[(210\,000 + 385\,000) \times 1/2]}$   
 $= \underline{\underline{2.62 \text{ times}}}$
- (iv) Debtors' collection period =  $\frac{(\text{Debtors} + \text{credit sales}) \times 12 \text{ months}}{\text{Credit sales}}$   
 $= \frac{[(262\,500 + 1\,008\,000) \times 12]}{1\,008\,000}$   
 $= \underline{\underline{3.12 \text{ months}}}$
- (v) Net profit ratio =  $\frac{(\text{Net profit} + \text{sales}) \times 100\%}{\text{Sales}}$   
 $= \frac{(119\,000 + 1\,260\,000) \times 100\%}{1\,260\,000}$   
 $= \underline{\underline{9.44\%}}$
- (vi) Return on capital employed =  $\frac{(\text{Net profit} + \text{capital employed}) \times 100\%}{\text{Capital employed}}$   
 $= \frac{[(119\,000 + 1\,925\,000) + 161\,000] \times 100\%}{1\,925\,000}$   
 $= \underline{\underline{5.70\%}}$

## (b) Liquidity

- there seems to be slight improvement in the liquidity position of the company
- the current ratio and quick ratio increased in 2001
- the company had also shortened the debtors' collection period
- the stock turnover rate shows that the company was slower in selling the stock in 2001

## Profitability

- the company's profitability has worsened during 2001
- as shown by decreases in net profit ratio and return on capital employed

Any other factors  $\frac{1}{2}$  Profitability Max 2.

2003 Q.4

**QUESTION 4**

- (a) (i) Fixed assets, 1 January 2001:  
 $\$180\,000 - \$45\,000 = \underline{\underline{\$135\,000}}$
- (ii) Current liabilities, 1 January 2001:  
 $\$45\,000 + 3 = \underline{\underline{\$15\,000}}$
- (iii) Shareholders' fund, 1 January 2001:  
 $\$180\,000 - \$57\,000 - \$15\,000 = \underline{\underline{\$108\,000}}$
- (iv) Current assets, 31 December 2001:  
 $\$213\,000 - \$153\,000 = \underline{\underline{\$60\,000}}$
- (v) Current liabilities, 31 December 2001:  
 $\$60\,000 - [(\$45\,000 - \$15\,000) + \$90\,000] = \underline{\underline{\$21\,000}}$
- (vi) Dividend for the year 2001:  
 $\$40\,000 - \$20\,000 - \$7\,000 = \underline{\underline{\$13\,000}} \quad \frac{1}{2}$

| 11. Stock              | \$60 000 000 × (1 - 40%) + 6            | = | \$ 6 000 000 |
| 12. Debtors            | \$60 000 000 × 2/12                     | = | \$10 000 000 |
| 13. Cash               | \$17 500 000 - 6 000 000 - 10 000 000 = |   | \$ 1 500 000 |

2000 Q.7

|                   |  |  |   |
|-------------------|--|--|---|
| (a) Closing stock | = \$648 000 + 8                            |  | 2 |
|                   | = <u>\$81 000</u>                          |  |   |
| Gross purchases   | 4, 4, 4, 4,                                |  | 2 |
|                   | \$648 000 + \$81 000 - \$81 000 + \$28 000 |  |   |
|                   | = <u>\$676 000</u>                         |  |   |

(4)

Alternative answer:

|                         | \$      | \$ | \$      |
|-------------------------|---------|----|---------|
| Cost of goods sold      |         |    |         |
| Opening stock           | 81 000  |    |         |
| Purchases               | 676 000 |    |         |
| Less: Purchases returns | 28 000  | 4  | 648 000 |
|                         |         |    |         |
| Less: Closing stock     | 81 000  | 4  | 648 000 |
|                         |         |    | (2)     |

(b)

|   | <u>356 000</u>      |      |
| Less: Drawings  | 36 000              | ½    |
| Balance as at 31 December 1999 (\$96 000 + 30%)             | <u>320 000</u>      | (12) |

(c)

The liquidity of Sunny Fashion has improved as revealed by an increase in current ratio and a shortening of debtors' collection period. However, the company was slower in selling its stock in 1999.

2

The profitability of the company has deteriorated as shown by a decrease in return on owner's capital.

| Capital as at 1.9.90                                | 80,000        |               |
| Add: Net profit for the year                        | 55,000        |               |
|   | 135,000       |               |
| Less: Drawings                                      | 40,000        |               |
| Capital as at 31.8.91                               | <u>95,000</u> |               |

Workings:

$$\begin{aligned} \text{Current ratio} &= 2:1 \\ \frac{\text{Current Assets}}{\text{Current Liabilities}} &= \frac{2}{1} \\ \underline{\text{Stock + Debtors + Cash}} &= \underline{\underline{\frac{2}{1}}} \quad \dots\dots(1) \\ \text{Creditors} &= 1 \end{aligned}$$

$$\begin{aligned} \text{Liquid Ratio} &= 1:1 \\ \frac{\text{Debtors + Cash}}{\text{Creditors}} &= \frac{1}{1} \\ \underline{\underline{\frac{20,000 + \text{Cash}}{\text{Creditors}}}} &= \underline{\underline{\frac{1}{1}}} \quad \dots\dots(2) \end{aligned}$$

$$\begin{aligned} \text{Solve (1) and (2),} \\ \text{Cash} &= \$30,000 \\ \text{Creditors} &= \$50,000 \end{aligned}$$

2004 Q.2

- (A) (a) Liquidity ratios measure the ability of an enterprise to pay its short-term obligations and to meet unexpected needs for cash. 2
- (b) Profitability ratios measure the operating performance of an enterprise for a given period of time. 2  
4
- (B) (a) Quick ratio =  $\frac{\text{Current assets} - \text{stock}}{\text{current liabilities}}$   
 $= \frac{(30,340 + 660)}{(26,900 + 3010)}$   
 $= \frac{31,000}{29,910}$   
 $= 1.04 : 1$  2
- (b) Stock turnover rate =  $\frac{\text{Cost of goods sold}}{\text{average stock}}$   
 $= \frac{155,750}{[(26,400 + 28,750) \times \frac{1}{2}]}$   
 $= \frac{155,750}{27,575}$   
 $= 5.65 \text{ times}$  2
- (c) Debtors' collection period =  $\frac{\text{Average debtors} \times 12 \text{ months}}{\text{net sales}}$   
 $= \frac{[(30,340 + 29,260) \times \frac{1}{2}]}{(248,600 - 15,200)} \times 12$   
 $= \frac{29,800}{233,400} \times 12$   
 $= 1.53 \text{ months}$  2

(d) Gross profit ratio =  $\frac{\text{Gross profit} \times 100\%}{\text{net sales}}$   
 $= \frac{[(248,600 - 15,200) - 155,750]}{(248,600 - 15,200)} \times 100\%$   
 $= \frac{77,650}{233,400} \times 100\%$   
 $= 33.27\%$  2

(e) Return on capital employed =  $\frac{\text{Net profit} \times 100\%}{\text{capital employed}}$   
 $= \frac{[34,260 + (50,000 + 12,890 + 15,500)]}{(34,260 + 78,390)} \times 100\%$   
 $= 43.70\%$  2

1. AL2008.Q1(b)

The shareholders' equity section of Hearty Ltd as at 31 December 2006 is as follows:

|  | \$                |
|--|-------------------|
| Ordinary shares (8 000 000 shares of \$1 each) | <u>8 000 000</u>  |
| General reserve                                | <u>2 100 000</u>  |
| Retained profits                               | <u>1 280 000</u>  |
|  | <u>11 380 000</u> |

*[Additional note, for 2017 DSE onwards]* As at 31 December 2006, 8 000 000 ordinary shares have been issued (calculated as \$8,000,000 / \$1).

In order to increase the market share, Hearty Ltd planned to establish three more outlets over the next few months. The total cost incurred for this expansion would be \$5 000 000 which was to be financed by the issue of 1 200 000 ordinary shares at \$2.50 each and \$2 000 000 6% debentures at par (repayable in 2017).

If the financing scheme was effected on 1 January 2007, the estimated profit before interest and tax for the year ended 31 December 2007 would be \$3 700 000, and the tax expenses \$200 000.

**REQUIRED:**

- (b) Calculate (to two decimal places) the following estimated accounting ratios for the year ended 31 December 2007:  
 (1) Return on capital employed (based on average year-end figures) (2 marks)  
 (2) Return on equity (based on year-end figures) (2 marks)  
 (3) Earnings per share (in cents) (2 marks)

**Reference:**

- (a) Distinguish between 'equity capital' and 'loan capital' (4 marks)

2. AL.2009.Q4(a), (b) [modified]

The summarized statement of financial position of Tai Wo Ltd at 31 December 2007 is as follows:

|   | \$                 |
|---|--------------------|
| Non-current assets                      | 7 530 000          |
| Working capital                         | 3 316 000          |
| Non-current liabilities – 5% debentures | <u>(5 500 000)</u> |
| Net assets                              | <u>5 346 000</u>   |

**Capital and reserves**

|   |                  |
|---|------------------|
| Ordinary shares of \$5 each             | 2 000 000        |
| General reserves                        | 1 000 000        |
| Retained profits as at 31 December 2006 | 1 220 000        |
| Net profit for the year 2007            | <u>1 126 000</u> |
|   | <u>5 346 000</u> |

The 5% debentures were issued at par on 1 January 2007. There was no movement in ordinary share capital and general reserves during year 2007.

BAFS – Accounting Ratios / Financial analysis (HKALE 2008 – 2012)

**REQUIRED:**

- (a) Based on the information above, calculate (to two decimal places) the following accounting ratios for the year 2007:  
 (1) Gearing ratio (using year-end figures)  
 (2) Earnings per share  
 (3) Return on equity (using average figures)  
 (4) Return on capital employed (using average figures) (4 marks)
- (b) Referring to your answers in (a) above, explain how the shareholders' return was affected by the gearing of Tai Wo Ltd. (3 marks)

3. AL2011.Q1(a)

Joey and Sam are in a partnership selling local and imported accessories. The following ratios relate to the partnership and the industry average for the year ended 31 December 2009:

|                                     | <i>Joey and Sam</i> | <i>Industry average</i> |
|-------------------------------------|---------------------|-------------------------|
| Trade receivables collection period | 4.2 months          | 3.5 months              |
| Trade payables repayment period     | 1.8 months          | 2.4 months              |
| Inventory turnover rate             | 5.7 times           | 5.0 times               |

**REQUIRED:**

- (a) With reference to all the above ratios, comment on the liquidity of Joey and Sam's partnership in 2009. (4 marks)

4. AL2012.Q5(a)(b)

The following data relates to Gordon Ltd for the year ended 31 December 2010:

|   | \$      |
|---|---------|
| Non-current liabilities: 4% debentures (issued in 2008) | 800 000 |
| Ordinary shares of \$2 per share, fully paid            | 970 000 |
| 6% preference shares of \$1 each (issued in 2009)       | 600 000 |
| Retained profits brought forward, 1 January 2010        | 880 000 |
| Net profit after tax for the year 2010                  | 320 000 |
| Taxation  | 90 000  |
| Dividend paid: Preference shares                        | 36 000  |
| Ordinary shares   | 72 000  |

**REQUIRED:**

- (a) Based on the information above, calculate (to two decimal places) the following accounting ratios for Gordon Ltd for the year ended 31 December 2010 using year-end figures:  
 (1) Capital gearing ratio (using year-end figures)  
 (2) Return on capital employed (using average figures)  
 (3) Earnings per share  
 (4) Dividend cover (8 marks)

- (b) Gordon Ltd plans to seek additional long-term finance and expand its business while maintaining a low capital gearing ratio to strengthen its creditworthiness and financial stability. Advise, with explanation, what financing arrangements Gordon Ltd should undertake. (3 marks)

BAFS – Accounting Ratios / Financial analysis (HKALE 2008 – 2012)

5. AL2010.Q4(A)(B) (Modified, added share premium to general reserve)

- (A) From the perspective of potential investors,  
 (a) Explain how they interpret dividend cover; and  
 (b) State three limitations of using ratio analysis in assessing the financial performance of a company. (2 marks) (3 marks)

- (B) The following financial information relating to Ming Ltd, a listed company providing financial services for customers in Hong Kong:

| Income statement for the year ended 31 December 2009 (extract) |              |
|--|--------------|
| Profit before interest and tax                                 | \$ 4 450 000 |
| Finance costs  | (400 000)    |
| Profit before tax  | \$ 4 050 000 |
| Taxation   | (1 100 000)  |
| Profit after tax   | \$ 2 950 000 |

  

| Statement of Financial Position as at 31 December 2009 (extract) |                   |
|--|-------------------|
| <b>Capital and Reserves</b>                                      | \$                |
| Ordinary Shares of \$2 each                                      | 12 000 000        |
| 8% Preference shares   | 4 000 000         |
| General reserve  | 12 900 000        |
| Retained profits   | \$ 3 400 000      |
|  | <u>32 300 000</u> |
| <b>Non-current liabilities</b>                                   |                   |
| 5% Debentures (repayable on 31 December 2015)                    | \$ 8 000 000      |
|  | <u>40 300 000</u> |

At 31 December 2009, the market price per ordinary share of Ming Ltd was \$5. Dividend declared and paid on the ordinary shares amounted to \$0.20 per share in 2009. The 8% preference shares were issued in 2007. There was no movement in ordinary share capital during the year 2009.

**REQUIRED:**

Calculate (to two decimal places) the following accounting ratios for the year 2009:

- (a) Earnings per share (1 mark)  
 (b) Price-earnings ratio (1 mark)  
 (c) Dividend cover (1 mark)

Alternative

|   | \$                  | \$                |
|---|---------------------|-------------------|
| Shareholders' equity as at 31 December 2006       |                     | 11 380 000        |
| Issue of 1 200 000 ordinary shares at \$2.50 each | (1,200,000 x \$2.5) | 3 000 000         |
| Profit before interest and tax                    |                     | 3 700 000         |
| Interest expense                                  | (\$2 000 000 x 6%)  | (120 000)         |
| Tax expense                                       |                     | (200 000)         |
| Profit after tax                                  |                     | 3 380 000         |
| Shareholders' equity as at 31 December 2007       |                     | 17 760 000        |
| Issue of \$2 000 000 6% debentures at par         |                     | 2 000 000         |
| Capital employed                                  |                     | <u>19 760 000</u> |

- (1) **Return on capital employed:** Profit before interest and tax / Capital employed

2

$$\$ 3 700 000 / \$ 19 760 000 = 18.72\%$$

- (2) **Return on equity:** Profit after interest and tax / Shareholders' equity

2

$$\$ 3 380 000 / \$ 17 760 000 = 19.03\%$$

- (3) **Earnings per share:** Profit after interest and tax / Number of ordinary shares

2

$$\$ 3 380 000 / (8 000 000 + 1 200 000) = 36.74 \text{ cents}$$

(6)

Reference: Part (a) Distinguish between equity capital and loan capital:

| <b>Equity capital</b>  | <b>Loan capital</b>   |
|--|---|
| - Shareholders have voting right   | - Debenture holders have no voting right                            |
| - Dividend is an appropriation of profit   | - Interest is an expense  |
| - Dividend rate is not fixed   | - Interest rate is fixed  |
| - There is no / stipulated date for repayment of capital                               | - There is a stipulated date for redemption of debentures           |
| - In case of liquidation, shareholders rank the last to receive back the fund invested | - Debenture holders rank before shareholders in case of liquidation |

(2 marks for each relevant comparison, max. 4 marks)

(4)

BAFS – Accounting Ratios / Financial analysis HKALE - Answer

2. AL.2009.Q4(a)(b)

(a)

|  |                     |   |
|--|---------------------|---|
| (1) Gearing ratio [ $\$5\ 500\ 000 / (\$5\ 346\ 000 + \$5\ 500\ 000)$ ]  | 50.71%<br>(or 0.51) | 1 |
| (2) Earnings per share [ $\$1\ 126\ 000 / (\$2\ 000\ 000 / 5)$ ]   | \$2.82              | 1 |
| (3) Return on equity<br>$\$1\ 126\ 000 / \{[\$5\ 346\ 000 - \$1\ 126\ 000] + \$5\ 346\ 000\} / 2\}$  | 23.54%<br>(or 0.24) | 1 |
| (4) Return on Capital employed<br>$[\$1\ 126\ 000 + (\$5\ 500\ 000 \times 5\%)] / \{[\$5\ 346\ 000 - \$1\ 126\ 000 + \$5\ 500\ 000] + (\$5\ 346\ 000 + \$5\ 500\ 000) / 2\}$ | 13.62%<br>or 0.14   | 1 |

(4)

(b)

- Tai Wo Ltd is a highly geared company with half of its capital employed contributed by loan capital.
- When the overall return of the company exceeds the fixed return to debenture holders, the profit in excess (residual profit) will go to the shareholders.
- In this case, the return on capital employed is 13.62% which is in excess of 5%. The profit in excess of 5% will go to the shareholders, resulting in a return on capital of 23.54%.

Max. 3

3. AL2011.Q1(a)

**Receivables collection period**

- The collection period of the partnership is longer than that of the industry average by 0.7 month. 0.5
  - It may be the result of a more lenient credit policy with a longer credit period granted to its customers in order to promote sales 1
- (max 1 mark)

**Payables repayment period**

- The repayment period of the partnership is shorter than the industry average by 0.6 month 0.5
  - The business has to repay the supplier faster than its competitors, which hampered the liquidity of the business. 1
- (max 1 mark)

**Inventory turnover rate**

- The inventory turnover rate is higher than industrial average by 0.7 times. 0.5
  - The higher the rate, the faster the flow of inventory, the faster the inventory replenishment and there is less obsolescence and outdated inventories. 1
- (max 1 mark)

**Overall comment**

- The higher inventory turnover rate implied the partnership was more able to sell inventories at a faster rate in 2009 and thus in a better liquidity position in this period.
- Yet, the longer collection period and the shorter repayment period indicated that the overall liquidity of the business was worse than its competitors in 2009.

2

3

BAFS – Accounting Ratios / Financial analysis HKALE - Answer

- The partnership can give cash discount to encourage early settlement from trade receivables, or try to find other suppliers with a longer credit period so as to maintain its liquidity.
- (1 mark each, max 1 mark)

Note: Making suggestions based on the ratios calculated is NOT REQUIRED in HKDSE since 2017.

(4)

4. AL2012.Q5(a)(b)

(a)

$$\begin{aligned}(1) \text{ Capital gearing ratio} \\ &= (\text{Non-current liabilities} + \text{Preference share capital}) / \text{Capital Employed} \\ &= (\$800\ 000 + \$600\ 000) / \$3\ 462\ 000 (\text{W1}) \\ &= 40.44\% \text{ (or } 0.40 / 0.40 : 1\text{)}\end{aligned}$$

(2)

(2) **Return on capital employed**

$$\begin{aligned}&= \text{Profit before interest and tax} / \text{Capital employed} \\ &= [\$320\ 000 + (\$800\ 000 \times 4\%)] + \$90\ 000] / \$3\ 356\ 000 (\text{W1}) \\ &= 13.17\%\end{aligned}$$

(2)

(3) **Earnings per share:**

$$\begin{aligned}&= (\text{Net profit after tax} - \text{Preference share dividend}) / \text{Number of ordinary shares outstanding} \\ &= (\$320\ 000 - \$36\ 000) - (\$970\ 000 / \$2) \\ &= \$0.59 \text{ or } \$58.57 \text{ cents}\end{aligned}$$

(2)

(4) **Dividend cover**

$$\begin{aligned}&= (\text{Net profit after tax} - \text{Preference share dividend}) / \text{Ordinary dividend paid} \\ &= (\$320\ 000 - \$36\ 000) - (\$72\ 000) \\ &= \$3.94 \text{ times}\end{aligned}$$

| Ordinary share capital                | 970 000          |    |
| Preference share capital              | 600 000          |    |
| Retained profits, 1 January 2010      | <u>880 000</u>   |    |
|                                       | 2 450 000        |    |
| Non-current liabilities               | 800 000          |    |
| Capital employed as at 1 January 2010 | <u>3 250 000</u> |    |

$$\text{Average capital employed} = (\$3 250 000 + \$3 462 000) / 2 = \$3 356 000$$

(b)

Advice:

- To reduce the capital gearing ratio, ordinary shares should be issued.

Explanation:

- Issuing preference shares would lead to higher capital gearing ratio as it would be added to the non-current liabilities in the calculation of the ratio.

- The company is committed to pay out preference share dividend at a stated rate, no matter the profitability is high or not.

- Other methods, e.g. issuing debentures, can raise capital but would lead to higher capital gearing ratio, so should not be considered.

Max. 2

(3)

BAFS – Accounting Ratios / Financial analysis HKALE - Answer

5. AL2010.Q4(A)(B) (Modified, added share premium to general reserve)

- (A)(a) Dividend cover measures the number of time annual ordinary dividend is covered by annual profit attributable to ordinary shareholders.

1

Interpretation: The higher the ratio, the more likely that the dividend can be maintained in the future.

1

- (b) Limitation of ratio analysis:

- Misleading results if the underpinning financial information is poor, e.g. poor estimation on depreciation and allowance for doubtful debts.
- Timeliness of information: ratio is based on past financial information, however, past performance of a firm does not necessarily indicate its future performance.
- Different judgment on the accounting policies to be used for certain transactions. With different accepted accounting policies used for the same transaction by different companies, it is difficult to compare and draw conclusion on their performance.
- Ratios can only identify the symptoms, but not the causes. Different interpretations can be drawn by different people.
- Adhere to the money measurement concept, non-monetary but significant items, such as quality of goods, management, the diversity of product, could not be reviewed.

(1 mark each, max 3 marks)

- (B)(a) **Earnings per share: (EPS)**

$$= (\$2 950 000 - \$4 000 000 \times 8\%) / (\$12 000 000 / \$2)$$

$$= \$0.44 \text{ per share}$$

1

- (b) **Price-earnings (P/E) ratio**

$$= \$5 / \$0.44$$

$$= 11.36$$

1

Or

$$\$5 / (\$2 950 000 - \$4 000 000 \times 8\%) / (\$12 000 000 / \$2)$$

$$= 11.41$$

- (c) **Dividend cover**

$$(\$2 950 000 - \$320 000) / (\$12 000 000 / \$2 \times \$0.2)$$

$$= 2.19 \text{ times}$$

1

BAFS – Accounting Ratios / Financial analysis (Sample Paper – 2021)

1. SP.P1B.Q6

Mr Chan is the owner of a furniture manufacturing and trading business. Most of the furniture was manufactured by his own factory in Hong Kong and the rest was purchased from several manufacturers in Shenzhen.

The following are the financial ratios of the business for the year ended 31 December 20X6:

|                    | Business    | Industry average |
|--------------------|-------------|------------------|
| Turnover           | \$1 250 000 | \$1 300 000      |
| Gross Profit ratio | 38%         | 60%              |
| Net profit ratio   | 6%          | 42%              |
| Current ratio      | 2.8:1       | 2.3:1            |
| Liquid ratio       | 0.8:1       | 1.2:1            |

- (a) Suggest two reasons why the gross profit ratio and net profit ratio of Mr Chan's business are much lower than the industry averages. (4 marks)  
 (b) Comment on the liquidity of Mr Chan's business in 20X6. (4 marks)

2. SP.P2A.Q8(b)(c)(d) (modified)

Good Prospect Limited commences its business on 1 January 20X6 and has made a net profit of \$3 000 000 for the year ended 31 December 20X6. However, the company experienced problems in getting \$1 800 000 to finance the acquisition of a plant in Tai Po for expansion.

As at 31 December 20X6, the long-term financing of Good Prospect Limited was as follows:

|  | \$'000       |
|--|--------------|
| Capital and reserves                       |              |
| 200 000 Ordinary shares of \$10 each       | 2 000        |
| 150 000 12% Preference shares of \$10 each | 1 500        |
| Retained profits                           | <u>1 600</u> |
|  | <u>5 100</u> |

After studying the information above, Mok, the executive director, proposed the following alternatives to finance the acquisition of the plant:

- Alternative 1: To issue 100 000 ordinary shares at \$18 per share. The annual ordinary dividend will remain at 20% on the net profit available for distribution to ordinary shareholders.
- Alternative 2: To issue \$1 800 000 8% debentures (repayable in June 20Y2) at par, payable in full on application. Debenture interest is payable twice a year on 1 January and 1 July.
- Alternative 3: To purchase the plant on credit. The terms of agreement provide for five annual payments of \$480 000, commencing at the end of the first year. Assume that interest accrues evenly over the credit period

It was estimated that following this expansion, the profit before interest for the first financial year would amount to \$3 600 000.

BAFS – Accounting Ratios / Financial analysis (Sample Paper – 2021)

- (b) Calculate the gearing ratio under each alternative immediately after the acquisition. (3 marks)  
 (c) Calculate the earnings per share under each alternative for the first financial year after the expansion. (Note: Ignore taxation) (3 marks)  
 (d) Based on your answer in (b) and (c), evaluate the above three financing alternatives from the perspective of shareholders. (6 marks)

3. PP.P1B.Q2

Glassy Ltd and Pearl Ltd are competitors in the same industry. Based on the following information, comment on the liquidity of Glassy Ltd in 2011. (6 marks)

|               | <u>Glassy Ltd</u> | <u>Pearl Ltd</u> | <u>Industrial Average</u> |
|---------------|-------------------|------------------|---------------------------|
| Current ratio | 2.8:1             | 2.0:1            | 1.9:1                     |
| Quick ratio   | 1.0:1             | 1.1:1            | 1.0:1                     |

4. PP.P2A.Q3(a)

Easy Company makes all purchases and sales on credit. The following balances of the company as at 31 December 2011 were extracted:

|  | \$                     |
|--|------------------------|
| Sales                                    | 10 186 000             |
| Purchases                                | 7 294 500              |
| Inventory – as at 1 January 2011         | 878 000                |
|  | as at 31 December 2011 |
| Trade receivables – as at 1 January 2011 | 990 000                |
|  | as at 31 December 2011 |
| Trade receivables – as at 1 January 2011 | 856 000                |
|  | as at 31 December 2011 |
|  | 996 000                |

**REQUIRED:**

- (a) Calculate (to one decimal place) the following accounting ratios for 2011:  
 (1) trade receivables collection periods (in months) (1 mark)  
 (2) inventory turnover (2 marks)

BAFS – Accounting Ratios / Financial analysis (Sample Paper – 2021)  
 5. 2013.Q7 [Note: Part (b)(ii) is out-of-syllabus since 2017DSE]

The balances of Able Company as at 31 December were as follows:

|                                    | 2011    | 2012    |
|------------------------------------|---------|---------|
|                                    | \$      | \$      |
| 4% Long-term loans                 | 67 000  | 120 000 |
| 8% Short-term loans                | 23 100  | 60 000  |
| Accounts payables                  | 43 300  | 100 200 |
| Accounts Receivables               | 37 500  | 85 864  |
| Bank overdraft                     | -       | 15 000  |
| Cash at bank                       | 32 020  | -       |
| Cash in hand                       | 200     | 500     |
| Inventory                          | 79 680  | 162 936 |
| \$5 Ordinary share, fully paid     | 155 000 | 155 000 |
| Property, plant and equipment, net | 254 000 | 333 622 |
| Retained profits                   | 115 000 | 132 722 |

Additional information:

- (i) All sales were made on credit.
- (ii) On 31 December 2010, Inventory and accounts receivables were \$88 320 and \$37 260 respectively.
- (iii) Total sales amount shown in the sales journal for 2011 and 2012 amounted to \$454 790 and \$625 942 respectively. Gross profit was \$96 110 for 2011 and \$230 191 for 2012. However, it was then discovered that a sales invoice of 2012 for \$14 000 had been omitted from the records of the books.
- (iv) There had been no change in share capital since 2010. The balance of the retained profits at 31 December 2010 was \$69 521.
- (v) In 2011 and 2012, no tax expenses were incurred and no dividend was declared.

**REQUIRED:**

- (a) Calculate (to two decimal places) the following ratios for 2011 and 2012 (assume 365 days per year)
    - (i) Current ratio
    - (ii) Liquid ratio
    - (iii) Day's sales in accounts receivables
    - (iv) Inventory turnover (in times)
    - (v) Net profit ratio
    - (vi) Earnings per share
  - (b) Based on the ratio calculated in (i) above,
    - (i) Briefly comment on the profitability of Able Company for the year 2012.
    - (ii) [Out-sy] Suggest three ways to improve the liquidity of Able Company.
- (14 marks)
- (3 marks)
- (3 marks)
- (Total: 17 marks)

6. 2014.P2A.Q6(b)

Although accounting ratios are useful tools in financial analysis, there are limits to their usefulness. State two of these limitations.

BAFS – Accounting Ratios / Financial analysis (Sample Paper – 2021)

7. 2015.Q9

Pearl Ltd had the following financial information related to the year 2014:

| As at 1 January 2014           | \$      |
|--------------------------------|---------|
| Shareholders' equity           | 300 000 |
| Retained profits               | 40 000  |
| Total assets                   | 343 000 |
| Non-current assets             | 101 000 |
| Inventory                      | 65 000  |
| Current liabilities (Note (i)) | 43 000  |

  

| For the year ended 31 December 2014                  | \$      |
|--|---------|
| Cash sales   | 60 000  |
| Credit sales   | 390 000 |
| Cash purchases                                       | 110 000 |
| Credit purchases                                     | 132 000 |
| Increase in current assets (not including inventory) | 27 000  |
| Increase in trade payables                           | 3 000   |

The retained profits as at 31 December 2014 amounted to \$128 000 and no profit appropriations were made during the year.

- (i) Pearl Ltd had trade payables only as its current liabilities.
- (ii) An electricity bill for December 2014 amounting to \$2500 was received on 16 January 2015. As the payment would be made in February 2015, no accounting record has been made by the bookkeeper.
- (iii) A physical inventory count on 4 January 2015 showed that the value of inventory on that date was \$31 700, which had been used for the computation of profits for the year 2014. During the period 1 January to 4 January 2015, there were credit purchases with a total list price of \$3000. A trade discount of 10% has been given by the supplier on these purchases and a 2% cash discount would be received if the settlement was made in two weeks. Goods costing \$5000 were sold during these 4 days.

**REQUIRED:**

- (a) Identify the relevant accounting principle or concept violated in (ii) above. Briefly explain.
- (b) Calculate the following amounts at 31 December 2014:
  - (i) Inventory
  - (ii) current assets
- (c) Calculate (to two decimal places) the following ratios for the year 2014:
  - (i) net profit ratio
  - (ii) quick ratio
  - (iii) trade payables turnover (in times)
  - (iv) inventory turnover (in times)

BAFS – Accounting Ratios / Financial analysis (Sample Paper – 2021)  
 (Please turn to next page for part (d))

Lily Ltd and Jasmine Ltd are two listed companies in the same industry and have a similar scale of production. They have a similar price. Their financial ratios for the year ended 2014 are shown below:

|                            | <u>Lily Ltd</u> | <u>Jasmine Ltd</u> |
|----------------------------|-----------------|--------------------|
| Return on capital employed | 31%             | 15%                |
| Gearing ratio              | 25%             | 65%                |
| Earnings per share         | \$18            | \$15.2             |

**REQUIRED:**

- (d) Pearl Ltd is planning to invest a designated amount of cash, for the same percentage of shareholding, in one of the above companies. Advise and explain which company Pearl Ltd should invest in based on the three ratios above.

(Total: 20 marks)

**Based on the following information, answer 2016.P1B.Q4(a)(b) and Q5(a)(b)**

John runs a small supermarket. Its financial statements for the year 2015 are given below:

Income statement for the year ended 31 December 2015

|                          | \$                   |
|--------------------------|----------------------|
| Sales                    | 100 000              |
| Less: Cost of goods sold | <u>60 000</u>        |
| Gross profit             | 40 000               |
| Less: General expenses   | <u>30 000</u>        |
| Net profit               | <u><u>10 000</u></u> |

Statement of financial position as at 31 December 2015

|                                  | \$                   | \$            |
|----------------------------------|----------------------|---------------|

Refer to the below information, answer 2019.P1B.Q4 or 2019.P1B.Q5.

Au's firm manufactures and sells garments. The following account balances were extracted from the books of Au's firm as at 31 December 2018:

|                             | \$        |
|-----------------------------|-----------|
| Sales                       | 2 300 000 |
| Inventory, 31 December 2018 | 100 000   |
| Gross profit for the year   | 1 495 000 |
| Net profit for the year     | 345 000   |
| Capital, 1 January 2018     | 1 827 500 |
| Machinery                   | 2 182 500 |
| Cash at bank                | 140 000   |
| Trade payables              | 250 000   |

In 2017, the return on capital employed and the current ratio of Au's firm were 25% and 1.4:1 respectively. In 2018, additional capital was not introduced and there were no drawings.

11. 2019.P1B.Q4

- (a) Calculate the following ratios for 2018 for Au's firm (to two decimal places):
  - (i) Gross profit ratio
  - (ii) Net profit ratio
  - (iii) Return on capital employed(1 mark)
(1 mark)
(2 marks)
- (b) Based on the return on capital employed, briefly comment on the profitability of Au's firm in 2018.
 (1 mark)

12. 2019.P1B.Q5

- (a) Prepare a statement of financial position of Au's firm as at 31 December 2018.
 (3 marks)
- (b) Based on the current ratio (to two decimal places), briefly comment on the liquidity of Au's firm as at 31 December 2018.
 (2 marks)

Fancy Limited's financial information for 2018 and 2017 is as follows.

|                                | <b>2018</b> |             |
|--------------------------------|-------------|-------------|
|                                | \$          |             |
| Sales (cash sales \$11 600)    | 298 200     |             |
| Cost of sales                  | 210 700     |             |
| Operating expenses             | 43 600      |             |
| <b>Balances at 31 December</b> |             |             |
|                                | <b>2018</b> | <b>2017</b> |
|                                | \$          | \$          |
| Non-current assets, net        | 144 800     | 145 300     |
| Inventory                      | 153 500     | 86 400      |
| Trade receivables              | 95 300      | 58 200      |

| Ordinary share capital         | 70 000      | 70 000      |
| Retained profits               | 124 800     | 80 900      |
| 5% long-term bank loan         | 95 000      | 95 000      |
| Cash at bank                   | 22 100      | 26 400      |

**REQUIRED:**

- (a) Calculate (to two decimal places) the following ratios for 2018:
  - (i) inventory turnover (in times)
  - (ii) trade receivables turnover (in times)
  - (iii) total assets turnover (in times)
  - (iv) gearing ratio

(Total: 8 marks)

Johnny Limited's financial year ends on 31 December each year. Information for 2019 is as follows:

|  |    |         |
|--|----|---------|
| Net profit after tax                                 | \$ | 80 200  |
| Dividend declared and paid for 2019: Ordinary shares |    | 13 500  |
| Preference shares                                    |    | 8 000   |
| <b>Balances as at 1 January 2019</b>                 |    |         |
| Retained profits                                     |    | 210 000 |
| General reserve                                      |    | 100 000 |
| <b>Balances as at 31 December 2019</b>               |    |         |
| Current liabilities                                  |    | 129 580 |
| 3% Debenture, repayable in 2025                      |    | 280 000 |
| 45 000 Ordinary share capital                        |    | 900 000 |
| 20 000 4% Preference share capital                   |    | 200 000 |
| General reserve                                      |    | 100 000 |

**REQUIRED:**

- (a) Prepare a statement to calculate the shareholders' funds as at 31 December 2019. (4 marks)
- (b) Calculate (to two decimal places) the following ratios for 2019:
  - (i) Gearing ratio (2 marks)
  - (ii) Earnings per share (2 marks)
  - (iii) Dividend cover for ordinary shares (in times) (2 marks)
- (c) Johnny Limited plans to raise \$1 million by long-term financing without deteriorating its solvency. Suggest, with explanation, one financing method Johnny Limited should use. (2 marks)

(Total: 12 marks)

(A) Chan Kee is a shop selling household products. The account balances as at 31 December 2020 extracted from its books were as follows:

|                               | \$      |
|-------------------------------|---------|
| Bank loan (due in March 2021) | 30 000  |
| Bank                          | 20 000  |
| Fixed deposit (for 6 months)  | 50 000  |
| Inventory                     | 180 000 |
| Trade payables                | 100 000 |
| Trade receivables             | 120 000 |

In 2020, the industry averages of the working capital ratio and acid test ratio were 1.9:1 and 1.0:1 respectively.

(a) Calculate (to two decimal places) the following ratios for 2020 for Chan Kee:

- (i) Working capital ratio (2 marks)
- (ii) Acid test ratio (3 marks)

(b) Briefly comment on the liquidity of Chan Kee on 31 December 2020.

1. 2013.Q7

(a)

|   | <u>2011</u>   | <u>2012</u>  |    |
|---|---|--|----|
| (i) Current ratio                         | $\frac{\$79\,680 + \$37\,500 + \$32\,020 + \$200}{\$43\,300 + \$23\,100}$ | $\frac{\$162\,936 + (\$85\,864 + \$14\,000) + \$500}{\$100\,200 + \$60\,000 + \$15\,000}$        | 2½ |
|   | = 2.25 : 1  | = 1.50 : 1   |    |
| (ii) Liquid ratio                         | $\frac{\$37\,500 + \$32\,020 + \$200}{\$43\,300 + \$23\,100}$             | $\frac{(\$85\,864 + \$14\,000) + \$500}{\$100\,200 + \$60\,000 + \$15\,000}$                     | 2  |
|   | = 1.05 : 1  | = 0.57 : 1   |    |
| (iii) Days' sales in accounts receivables | $\frac{(\$37\,500 + \$37\,260) / 2}{\$454\,790} \times 365 \text{ days}$  | $\frac{(\$37\,500 + \$85\,864 + \$14\,000) / 2}{\$625\,942 + \$14\,000} \times 365 \text{ days}$ | 2½ |
|   | = 30.00 days  | = 39.17 days   |    |
| (iv) Inventory turnover (in times)        | $\frac{\$454\,790 - \$96\,110}{(\$79\,680 + \$88\,320) / 2}$              | $\frac{(\$625\,942 + \$14\,000) - (\$230\,191 + \$14\,000)}{(\$79\,680 + \$162\,936) / 2}$       | 2½ |
|   | = 4.27 times  | = 3.26 times   |    |
| (v) Net profit ratio                      | $\frac{\$115\,000 - \$69\,521}{\$454\,790} \times 100\%$                  | $\frac{(\$132\,722 + \$14\,000) - \$115\,000}{\$625\,942 + \$14\,000} \times 100\%$              | 2½ |
|   | = 10.00%  | = 4.96%  |    |
| (vi) Earnings per share                   | $\frac{\$115\,000 - \$69\,521}{31\,000 \text{ shares}}$                   | $\frac{(\$132\,722 + \$14\,000) - \$115\,000}{31\,000 \text{ shares}}$                           | 2  |
|   | = \$1.47 per share  | = \$1.02 per share   |    |

(b)(i)

Profitability of 2012 was worsen than 2011

Other comments:

- net profit ratio dropped substantially from 10% to 4.96%.
- this might be the result of poor control over the operating expenses
- earnings per share, which is a yardstick for the performance of the company, was decreased by \$0.45 (1 mark for each relevant comment, max. 2 marks)

## 2022

2. Jacky commenced a trading business on 1 January 2020. On that day, office equipment was acquired for \$980 000. The office equipment is to be depreciated using the straight-line method at a rate of 10% per annum.

All sales and purchases are made on a credit basis. On 1 January 2021, the amount due from customers was \$45 000. The statement of financial position as at 31 December 2021 includes the following items only and the balances of some accounts were confirmed as below:

|   | \$          |
|---|-------------|
| Office equipment                            | 980 000     |
| Accumulated depreciation – office equipment | ?           |
| Trade receivables                           | ?           |
| Inventory                                   | 159 750     |
| Bank  | 22 000 (Cr) |
| Trade payables                              | ?           |
| Capital, 1 January 2021                     | 500 000     |
| Net profit                                  | ?           |
| Long-term bank loan                         | ?           |

Additional information for 2021:

|                                   |           |
|-----------------------------------|-----------|
| Working capital, 31 December 2021 | \$66 000  |
| Net sales for the year            | \$600 000 |
| Net profit ratio                  | 30%       |
| Trade receivables turnover        | 12 times  |
| Gearing ratio                     | 20%       |

### REQUIRED:

Prepare a statement of financial position as at 31 December 2021. (8 marks)

(Total: 8 marks)

(ii) Out-of DSE syllabus, for reference only.

**Ways:**

- better control over the level of inventory kept
- tighten credit policy so as to shorten its collection period from customers
- increase cash discounts to attract early settlement from customers
- issue shares instead of making loans and bank overdraft

(1 mark for each relevant way, max. 3 marks)

2. 2015.Q9

(a)

- Accrual concept is violated.
- Revenues and expenses are recognised and included in the financial statements when they are earned or incurred, not when they are received or paid.
- Therefore, the electricity expenses should be recorded in the financial statements of 2014, though it was still unpaid at the year end.

3

(3)

(b)(i)

Inventory  
 $= \$31\,700 - (\$3000 \times 0.9) + \$5000$   
 $= \$34\,000$

1

1

1

(b)(ii)

Current assets  
 $= (\$343\,000 - \$101\,000) + \$27\,000 - (\$65\,000 - \$34\,000)$   
 $= \$238\,000$

2

3

(c)(i)

Net profit ratio:  
 $= \frac{[(\$128\,000 - \$40\,000) + (\$34\,000 - \$31\,700) - \$2500] \times 100\%}{390\,000 + 60\,000}$   
 $= \frac{\$87\,800 \times 100\%}{\$450\,000}$   
 $= 19.51\%$

2

2

(c)(ii)

Quick ratio:  
 $= \frac{\$238\,000 - \$34\,000}{\$43\,000 + \$3000 + \$2500}$   
 $= \frac{\$204\,000}{\$48\,500}$   
 $= 4.21:1$

2

2

**Trade payables turnover (times)**

$$\begin{aligned} &= \frac{\$132\,000}{(\$43\,000 + \$46\,000)/2} \\ &= \frac{\$132\,000}{\$44\,500} \\ &= 2.97 \text{ times} \end{aligned}$$

2

(c)(iv)

**Inventory turnover (times)**  
 $= \frac{\$65\,000 + (\$110\,000 + \$132\,000) - \$34\,000}{(\$65\,000 + \$34\,000)/2}$   
 $= \frac{\$273\,000}{\$49\,500}$   
 $= 5.52 \text{ times}$

2

(d)

- Pearl Ltd should invest in Lily Ltd.  
Lily Ltd is a better investment because it has
- higher return on capital employed: it has higher profitability with more efficient use of its capital to generate profits.
- Lower gearing ratio: It has lower degree of leverage and hence lower risk and financial burden.
- Higher earnings per share: it has higher profitability and the amount of profits earned for each outstanding share is higher.

1

1

1

1

3. SP.P1B.Q6

(a) Reasons:

- relatively low selling price
- relatively high production cost
- operating costs are high / control on operating costs is ineffective

(2 marks for each relevant reason, max. 4 marks)

(4)

(b) Words in this format are from the marking scheme, *words in italics are explanations*.

- The liquidity of the business is **worse** than the industry average as shown by a *lower liquid ratio*
- There are **not sufficient liquid assets** to meet its immediate debts as *the liquid ratio is lower than 1:1*
- Too much capital is tied up in stock as shown by a significant difference between the current ratio (2.8:1) and the liquid ratio (0.8:1)

(2 marks for each relevant comment, max. 4 marks)

3

BAFS – Accounting Ratios / Financial analysis HKDSE Questions - Answers

4. SP.P2A.Q8(b)(c)(d) (modified)

(b)

Gearing ratio:

Alternative 1

$$1500 / (5100 + 1800) = 21.74\%$$

1

Alternative 2

$$(1500 + 1800) / (5100 + 1800) = 47.83\%$$

1

Alternative 3

$$(1500 + 1440) / (5100 + 1440) = 44.95\%$$

1

(3)

(c)

Earnings per share:

Alternative 1

$$(3600 - 180) / 300 = \$11.4 \text{ per share}$$

1

Alternative 2

$$(3600 - 144 - 180) / 200 = \$16.38 \text{ per share}$$

1

Alternative 3

$$(3600 - 120 - 180) / 200 = \$16.5 \text{ per share}$$

1

(3)

(d)

Gearing position:

Max. 3

- Capital gearing depicts the relationship between equity capital and fixed-interest loan capital (including preference share capital).
- Among the three alternatives, Alternative 1 is less geared (only 21.74% capital was loan capital) than that of Alternatives 2 and 3 (more than 40% capital was loan capital)
- Interest has to be paid half-yearly under Alternative 3 and Alternative 3 requires an annual repayment of 20% of the liability.
- Overall, shareholders bear lower risk under Alternative 1.

Return to shareholders:

Max. 3

- Under all three alternatives, the return to long-term capital employed included preference dividend and ordinary dividend.
- Both Alternative 2 and 3 impose interest burden on the company and can weaken the company's profitability and liquidity position. Shareholders may suffer if the estimated profit is not attained.
- Based on the earnings per share, ordinary shareholders will benefit from the highly geared position under Alternatives 2 and 3.

BAFS – Accounting Ratios / Financial analysis HKDSE Questions - Answers

5. PP.PIB.Q2

Current ratio of Glassy Ltd is higher than that of Pearl Ltd which indicates its greater ability to meet short-term obligations.

Quick ratio of Glassy Ltd is lower than that of Pearl Ltd which means it is less able to pay its immediate debt. (1)

However, as the current ratio of Pearl Ltd is more comparable to the industrial average, the higher current ratio of Glassy Ltd might imply its inability of using available resources to grasp investment opportunity. (2)

Besides, the significant difference between the quick ratio and current ratio of Glassy Ltd as compared with Pearl Ltd might imply Glassy Ltd is tied up with excessive inventories or other repayments. (2)

6. PP.P2A.Q3(a)

$$(1) \text{ Trade receivables collection periods} = \frac{(\$856\ 000 + \$996\ 000)/2}{\$10\ 186\ 000} \times 12 \text{ months} \quad 1 \\ = 1.1 \text{ months}$$

$$(2) \text{ Inventory turnover} = \frac{\$7\ 182\ 500 \text{ (W1)}}{(\$878\ 000 + \$990\ 000)/2} = 7.7 \text{ times} \quad 2$$

$$\begin{aligned} \text{(W1) Cost of goods sold} &= \$878\ 000 + \$7\ 294\ 500 - \$990\ 000 \\ &= \$7\ 182\ 500 \end{aligned}$$

7. 2014.P2A.Q6(b)

- Accounting ratios are calculated based on historical cost and hence may not fairly reflect current performance.
  - Accounting ratios are calculated based on past financial information. Past performance of a company does not necessarily indicate its future performance.
  - Accounting ratios are affected by accounting estimates. Differences in accounting policies will hinder inter-company comparisons.
  - Accounting ratios can only identify the symptoms, but not the cause. They are not able to provide any suggestions or advice to solve the existing or future problems.
  - Non-monetary but significant items, such as the quality of the products, leadership of the management and the business environment, are ignored.
- (1 mark for each relevant limitation, max. 2 marks)

8. 2016.P1B.Q4(a)(b)

$$\begin{aligned} (\text{a})\text{(i)} \quad \text{Gross profit ratio} &= \$40\ 000 / \$100\ 000 \times 100\% = 40\% & 1 \\ (\text{ii}) \quad \text{Net profit ratio} &= \$10\ 000 / \$100\ 000 \times 100\% = 10\% & 1 \\ (\text{iii}) \quad \text{Return on capital employed} &= \$10\ 000 / [(\$30\ 000 + \$37\ 000)/2] \times 100\% = 29.85\% & 1 \end{aligned}$$

- (b) John's supermarket:
- Has higher gross profit ratio but lower net profit ratio
  - Is poor in controlling expenses / administrative arrangements

BAFS – Accounting Ratios / Financial analysis HKDSE Questions - Answers  
9. 2016.P1B.Q5(a)(b)

- (a)(i) Working capital = \$40 000 - \$30 000 = \$10 000 1  
 (ii) Current ratio = \$40 000 / \$30 000 = 1.33:1 1  
 (iii) Liquid ratio = \$6000/\$30 000 = 0.20:1 1  
 (b) The liquidity of John's supermarket is poor due to the low current ratio and liquid ratio 1  
 - It has difficulty meeting its immediate debts  
 - Its current assets are tied up in inventory  
 (1 mark for each relevant point, max. 1 mark) Max. 1

10. 2018.P2A.Q5

- (a) (i) Working capital ratio  
 2017:  $\frac{\$364\,000 + (\$190\,000 - \$17\,000) + \$128\,000}{\$202\,000 + \$15\,000 + \$90\,000} = \frac{\$665\,000}{\$307\,000} = 2.17:1$  2
- (ii) Inventory turnover  
 2017:  $\frac{\$136\,500 + \$778\,050 - \$364\,000}{(\$136\,500 + \$364\,000)/2} = \frac{\$550\,550}{\$250\,250} = 2.20 \text{ times}$  2
- (iii) Average trade receivables collection period  
 2017:  $\frac{(\$110\,000 + \$190\,000 - \$17\,000)/2}{\$780\,000 - \$17\,000} \times 365 = \frac{\$141\,500}{\$763\,000} \times 365 = 67.69 \text{ days}$  2
- (iv) Average trade payables repayment period  
 2017:  $\frac{(\$58\,000 + \$202\,000)/2}{\$778\,050 \times 80\%} \times 365 = \frac{\$130\,000}{\$622\,440} \times 365 = 76.23 \text{ days}$  2  
 (8)
- (b) (i) Gearing ratio  
 2017:  $\frac{\$180\,000}{\$180\,000 + \$700\,000 + (\$158\,000 - \$17\,000)} \times 100\% = \frac{\$180\,000}{\$1\,021\,000} \times 100\% = 17.63\%$  1  
 2016:  $\frac{\$753\,800}{\$753\,800 + \$200\,000 + \$42\,000} \times 100\% = \frac{\$753\,800}{\$995\,800} \times 100\% = 75.70\%$  1
- (b)(ii) Comment:  
 - The solvency has improved in 2017 1  
 - The company issued ordinary share capital during 2017 1  
 - The company repaid a large portion of long-term loan during 2017 2  
 (1 mark for each relevant comment, max. 2 marks) (3)  
13 marks

**Marking notes for 2018Q5:**

- General comment (1) + Rationale (2)
- General comment

| General comment – accepted (1 mark) | General comment – not accepted (no mark) |
|-------------------------------------|--|
| The solvency has improved in 2017   | Good solvency in 2017                    |

BAFS – Accounting Ratios / Financial analysis HKDSE Questions - Answers

|  |            |
|--|------------|
| The solvency position was good in 2017 with that of 2016's           | Low geared |
| The business has become less risky in paying non-current liabilities |            |

● Rationale

- ✓ **Complete answer:** The company issued ordinary share capital (1) to repay long term loan in 2017 (1)  
 ● The following answers are incomplete -> 1 mark

| Incomplete rationale, 1 mark                                    | Rationale – not accepted (no mark)                              |
|---|---|
| The company had more shareholders' fund in 2017                 | The company had large amount of capital in 2017                 |
| The company had less portion of non-current liabilities in 2017 | The company had small amount of non-current liabilities in 2017 |

11. 2019.P1B.Q4(a)(b)

- (a)(i) Gross profit ratio =  $\$1\,495\,000 / \$2\,300\,000 \times 100\% = 65.00\% \text{ or } 65\% \text{ or } 0.65$  1  
 (ii) Net profit ratio =  $\$345\,000 / \$2\,300\,000 \times 100\% = 15.00\% \text{ or } 15\% \text{ or } 0.15$  1  
 (iii) Capital as at 31 December 2018 =  $\$1\,827\,500 + \$345\,000 = \$2\,172\,500$  2  
 Average capital =  $(\$1\,827\,500 + \$2\,172\,500) / 2 = \$2\,000\,000$   
 Return on capital employed =  $\$345\,000 / \$2\,000\,000 = 17.25\%$   
 or  $0.1725 \text{ or } 0.1725:1 \text{ or } 17\% (1.5)$   
 or  $\frac{345,000 \times 100\%}{2,172,500} \quad 0.5 \quad 0.5$
- (b) As compared with 2017, Au's firm was relatively less efficient in using its owners' capital to generate profits in 2018. 1

**Marking notes – Q4(b)**

- Answer should include the following 3 parts:
  - In using its owners' capital 運用東主資本
  - To generate profit 產生利潤
  - Relatively less efficient 效率相對較低

Answers not accepted:

- ✗ poor expense management 費用管理不善/ too much expenses 費用過多
- ✗ lower profit 盈利下降, lowered/reduced/decreased profitability 盈利能力下降
- ✗ lower Return on Capital Employed 較低運用資金報酬率

| Au's firm                        | Statement of financial position as at 31 December 2018 |          |     |
|----------------------------------|--|----------|-----|
|                                  | \$   | \$       | \$  |
| <b>Non-current assets</b>        |  |          |     |
| Machinery                        | 2 182 500  | 0.5      |     |
| <b>Current assets</b>            |  |          |     |
| Inventory                        | 100 000  | 0.5      |     |
| Cash at bank                     | 140 000  | 0.5      |     |
|                                  | <u>240 000</u>   |          |     |
| <b>Less: Current liabilities</b> |  |          |     |
| Trade payables                   | 250 000  | (10 000) | 0.5 |
|                                  | <u>2 172 500</u>                                       |          |     |
| <b>Financed by:</b>              |  |          |     |
| Capital, as at 1 January 2018    | 1 827 500  | 0.5      |     |
| Add: Net profit                  | 345 000  | 0.5      |     |
|                                  | <u>2 172 500</u>                                       | (3)      |     |

(b) Current ratio = \$240 000 / \$250 000 = 0.96:1

Comments:

- the current ratio is lower than 1:1; the firm may have difficulty in repaying its short-term debts.
- as compared with 2017, the liquidity of the firm was poorer due to its lower current ratio (1 mark for each relevant comment, max. 1 mark)

#### Marking notes – Q5

##### Part (a)

- T-form is accepted [(NCA + CA) on LH side, (Capital + CL) on RH side]
- **CA + CL or Capital – CL** → 0 mark for CL
- **(NCA + CA) – CL = Capital** → 0 mark for CL
- CL without 'less' OR a bracket to indicate minus → 0 marks
- Items under no/abbreviated subheading → first item being the respective category
- Items under wrong subheading → 0 marks
- All assets/liabilities items under **Assets/Liabilities** will be treated as under NCA/NCL
- No marks for items duplicated, e.g. same item under NCA and CA (0 mark for both items)
- No marks for abbreviation, e.g. Capital, bal as at 1 Jan 18, opening capital X, (Net) Profit

##### Part (b)

- 0.96 ✓ (1)
- Wrong answer BUT correct workings (0.5)
- Did not calculate current ratio of 2018 / comment based on the ratio of 2017 (0)

13. 2019.P2A.Q1

(a) Inventory turnover:  
存貨周轉率 (次)

$$\frac{\$210\,700 \text{ (0.5)}}{(\$153\,500 + \$86\,400) / 2 \text{ (1)}} = \frac{\$210\,700}{\$119\,950} = 1.76 \text{ times 次}$$

2

(b) Trade receivables turnover (in times)  
應收貨款周轉率 (次)

$$\frac{\$298\,200 - \$11\,600 \text{ (0.5)}}{(\$95\,300 + \$58\,200) / 2 \text{ (1)}} = \frac{\$286\,600}{\$76\,750} = 3.73 \text{ times 次}$$

2

(c) Total assets turnover (in times)  
總資產周轉率 (次)

$$\frac{\$298\,200 \text{ (0.5)}}{\$144\,800 + \$153\,500 + \$95\,300 + \$22\,100} = \frac{\$298\,200}{\$415\,700} = 0.72 \text{ times 次}$$

2

0.5 mark for any 2 correct figures  
任何 2 個正確數字得 0.5 分 (1)

(d) Gearing ratio 槓桿比率:

$$\frac{\$95\,000 \text{ (0.5)}}{\$95\,000 \text{ (0.5)} + (\$70\,000 + \$124\,800 \text{ (0.5)})} = \frac{\$95\,000}{\$289\,800} = 32.78\% / 0.33$$

2

8 marks

#### Supplementary marking notes for 2019.P2A.Q1(a)

- Answer correct, no need to trace workings
- Missing unit, e.g. days, times, % if given in the question, no mark deducted
- Wrong unit used no mark for the answer, check workings

(a)

| Statement to calculate the shareholders' funds as at 31 December 2019 | \$               | \$  |
|---|------------------|-----|
| Ordinary share Capital  | 900 000          | 0.5 |
| 4% Preference Share Capital   | <u>200 000</u>   | 0.5 |
|   | 1 100 000        |     |
| General reserves  | 100 000          | 0.5 |
|   | 1 200 000        |     |
| Retained profits as at 1 January 2019                                 | 210 000          |     |
| Add: Net profit after tax   | <u>80 200</u>    |     |
|   | 290 200          |     |
| Less: Dividend for 2019 (\$13 500 + \$8 000)                          | <u>21 500</u>    |     |
| Retained profits as at 31 December 2019                               | 268 700          | 2   |
| Shareholders' funds as at 31 December 2019                            | <u>1 468 700</u> | 0.5 |
|   | (4)              |     |

(b)(i) Gearing ratio:

$$\begin{aligned}
 &= (\text{Non-current liabilities} + \text{Preference share capital}) / (\text{Non-current liabilities} + \\
 &\quad \text{Shareholders' funds}) \times 100\% \\
 &= \frac{(\$280 000 + \$200 000)}{(\$280 000 + \$1 468 700)} \times 100\% \\
 &= 27.45\%
 \end{aligned}$$

2

(ii) earnings per share:

$$\begin{aligned}
 &= (\text{Net profit after tax} - \text{Preference Dividend}) / \text{Number of ordinary shares issued} \\
 &= \frac{(\$80 200 - \$8 000)}{45 000} \\
 &= \$1.60
 \end{aligned}$$

2

Dividend cover for ordinary shares:

$$\begin{aligned}
 &= (\text{Net profit after tax} - \text{Preference Dividend}) / \text{Ordinary dividend} \\
 &= \frac{(\$80 200 - \$8 000)}{13 500} \\
 &= 5.35 \text{ times}
 \end{aligned}$$

2

(6)

(c) Financing method:

- issue of ordinary share

1

Explanation:

- this will lower the gearing ratio and the solvency of the company will be enhanced
  - as there is no need to repay the issued ordinary share capital, the solvency of the company will not deteriorate
- (1 mark for each relevant explanation, max. 1 mark)
